The Basin Victoria, 3154

Attention : Jonathan Gloster

### Cooling Tower Coatings

Amerlock 400/2K High Build Glass Flake Epoxy is high build glass flake reinforced epoxy designed to provide superior long term corrosion protection in atmospheric and immersion situations of fresh and salt water and has high chemical resistance in immersion, including cooling towers.

Amerlock 400/2K High Build Glass Flake Epoxy has been used in Australia and globally for surface protection of cooling towers for over 40 years.

Jim Strain of J & P Painting Services has himself been using Amerlock 400/2K High Build Glass Flake Epoxy for more than 20 years with great success. In all this time we have not been aware of one single failure. In fact Jim has re-visited cooling towers coated 10 years previous with Amerlock 400/2K High Build Glass Flake Epoxy and found to be in near perfect condition.

If you have any further queries, please don't hesitate to contact me.

Yours Sincerely,

**Dragan Stevanovic** | Victoria/Tasmania Sales Manager | PPG Protective Coatings
